NOTE

This list of additional references brings down to date the "List of books (with references to periodicals) on mercantile marine subsidies," third edition issued in 1906. The pagination continues the pagination of the third edition, so that it will be an easy matter to attach the supplement to the earlier part.

When printed catalogue cards exist for any work entered in the list, the Library of Congress card number is printed immediately after the entry at the left. On the same line to the right the class mark, where determined in the new classification, is printed in heavier type.
